

# **Project Milestone 3**

**Recitation Number:** 113

**Team Number:** 3

**Team Name:** Extra-Small

**Team Members:**

1. Justin Miller
2. Brandon O'Neill
3. Giovanni Visco
4. Jiayao Li
5. Maksim Vasilyev
6. Prakash Gurung

**Features Completed:** \*

1. Login html file
2. Register html file

\*html files for all features were in the process of being developed, but were not yet able to be presented.

**What worked during the demo:**

1. Login html
2. Register html
3. Login and register redirect to home

**Issues Faced:**

- No issues were faced during the project demo itself
- Ran into some issues during development of certain features, such as the communication feature requiring code and files that we had little to no experience working with.
- Back-End Database was still in the process of being determined. Options were being weighed but we had not decided on a final design choice, and therefore did not have a functioning database for the demo.

**Suggestions Offered by the TA:**

- Suggested easy ways to implement database through Django and SQL, which helped us to finalize our database design choice (we decided on using Django).
