## Project Idea

- Develop a CU marketplace
- Similar to Facebook marketplace or ebay

# Tools

- GroupMe  
★ ★ ★ ★
- Github  
★ ★ ★ ★
- Django  
★ ★ ★ ★ ★

# Methodologies

- Iterative
- Agile Method
- Peer Code Review

## Expected Tools

- PyUnit (for testing)
- LocalHost (for deployment environment)

# Challenges

- Schedule conflicts
  - Created setbacks for software development
  - Had to reschedule meetings/make up work individually
- Reading from database
  - Spent too much time trying to get images to and from database
- Useless html page development
  - Created html pages but Django uses different implementation
  - We had to rewrite most of the features using Django
