Team member commits are shown above, with usernames corresponding to the members as follows:

bron4592: Brandon O'Neill
jumi1165: Justin Miller
eswd0: Jiayao Li
mava98: Maksim Vasilyev
givi0519: Giovanni Visco

It should also be noted that although commits from mava98 and givi0519 appear less, these members developed and tested certain functionalities before relaying the code directly to someone with more complete code without making an official commit.

Deployment : The deployment environment used was localhost. To access, one must have Python 3.6 or later and Django installed. The sko_swap folder is the only folder that needs to be downloaded from the project code repo. From the command line, cd into the sko_swap directory and run the line (if on mac):
- python mange.py runserver

This will start the local server and can be accessed in a browser at localhost:8000
